

FALL TREE PLANTING SPECIAL DELIVERED AND PLANTED

KALAMAZOO AND PORTAGE RESIDENTS, WE ARE LOCATED IN YOUR AREA

We are offering evergreen trees delivered and planted at a special price this fall-See trees on back
 Are you looking for more privacy in your back yard? Maybe looking to reduce your carbon footprint? Then our evergreens are the answer you have been looking for.
 Not only do evergreens provide privacy through the winter months but they don't drop leaves so no mess! They also remove carbon dioxide from the environment during the summer and all winter long.
 Sod removal, bed edging and mulch install available the same day as trees planted.
 These prices are for 7'-8' trees and a three-tree minimum. 5% Discount for 5-9 trees purchased. 10% discount for 10 or more trees purchased.
 Larger or smaller sizes are available. Call for pricing.
 Deciduous trees also available. Call for pricing.
 A tractor with turf tires will be used to plant the trees so it's gentle on your yard.
 We will have your property marked by miss dig so it's a worry-free installation
 Worried we might hit a sprinkler line? We've got you covered there as well. We have a sprinkler tech that can get those lines repaired for a reasonable rate.
 Need trees removed before planting? Give us a call!

Curious on the price? You can calculate it yourself or call us and we will come out and give you a price!

Please select the trees you would like, the amount of sod you want removed, the type and amount of edging you would like and the amount and type of mulch. Please initial for sprinkler repair-see below.

- A. Type of Trees: _____ Number of Trees: _____ X\$395(price per Tree)

NORWAY SPRUCE

This fast growing evergreen is great for quick privacy. It will grow 1' to 2' per year. Dark green and will grow in most conditions. Majestic dark green evergreen tree of conical shape with draping branches. This fast growing spruce is an excellent specimen and widely used in forming windbreaks. Grows well in most conditions.

WHITE SPRUCE

Short blue-green needled tree that grows at a medium to fast rate. Survives well in drought conditions. Popular as an ornamental and windbreak tree.

CONCOLOR FIR

Also called White Fir. Densely branched pyramidal shaped conifer with rubbery, soft, powder blue-green needles about 2 inches long. Similar in appearance to a Blue Spruce, but needles not sharp. Distinct citrus aroma. Withstands heat and dryness better than other firs and grows best in well drained soils. Popular as a landscape specimen.

BLACK HILLS SPRUCE

Slow growing conical evergreen tree, densely set with dark green foliage. Short-needed with more dense, compact growth habit than White Spruce. Used as an accent or windbreak.

FRASER FIR

A soft, waxy, aromatic, deep blue-green needled fir tree with a silvery underside. Grows best in cool, moist, well-drained soil conditions. Not tolerant of wet sites or heavy clay soils.

WHITE PINE

This rapid growing five-needled pine is pyramidal shaped when young, becoming umbrella shaped with age. Needles are long, soft and light green. Widely used as a specimen or backdrop for flowering shrubs. Shapes well.

SERBIAN SPRUCE

Tall spire-like tree having two-toned needles that shimmer from a distance. Attractive upswept pendulous branches and upright symmetrical shape. Produces purple cones that mature brown. Popular as a landscape tree.

CANAAN FIR

A true fir genetically intermediate between Balsam and Fraser, but is a little more tolerant of wetter soil and drought conditions. Late bud break and adaptability to a variety of soils make it an excellent landscape tree.

Canadian Hemlock

This medium growth rate evergreen is your best option for shady areas. Likes well drained soil. Can be pruned regularly to maintain height and width.
